SUMMARY

Android Developer with professional experience building, deploying, and maintaining production Android applications using **Kotlin, Java, MVVM Architecture, Android SDK, Jetpack Compose, Firebase, REST APIs, and Retrofit**. Successfully delivered **20+ Google Play Store releases**, implemented **7 REST API integrations**, shipped **20+ production feature updates**, and addressed **20+ production crashes** across commercial applications including **Saral Truck, eGuruji, and OneClick CRM**. Experienced in **Firebase Realtime Database, Room Database, WorkManager, Crashlytics, Google Play Console, and Agile Development**, with a strong focus on building scalable, high-performance mobile applications and modern AI-powered solutions.

EXPERIENCE

Android Developer Intern 01/2026 – 07/2026
Inforyashonand Technology Pvt. Ltd. Sangli

- Built and deployed production-ready **Aadhaar Verification, RC Verification, WhatsApp PDF Delivery**, and **Location Tracking** modules for the **Saral Truck** Android application using **Java, MVVM, Android SDK, Firebase, and REST APIs**.
- Integrated **7 REST API endpoints** using **Retrofit**, implementing secure networking, exception handling, retry mechanisms, and JSON serialization for reliable backend communication.
- Distributed **15+ production feature updates** and UI/UX enhancements for the **Saral Truck** application, improving onboarding workflows, operational efficiency, and user experience.
- Managed and deployed **20+ Google Play Store releases**, including version management, staged rollouts, production monitoring, and post-release validation.
- Resolved **20+ production crashes** by analyzing **Firebase Crashlytics** reports collected across **3+ Android devices**, significantly improving production stability and application reliability.
- Optimized **Firebase Realtime Database synchronization** across **20+ production** releases, reducing duplicate requests and improving offline data consistency for Android applications.
- Collaborated with backend engineers, QA teams, and product stakeholders to convert business requirements into scalable, production-ready Android features using **Agile** methodologies.

Android Developer Intern 07/2024 – 09/2024
EduSkills – Google for Developers

- Developed Android applications using **Kotlin, Android SDK, Jetpack Compose, MVVM Architecture, Material Design 3, Kotlin Coroutines, ViewModel, and Jetpack Navigation**, following Google's modern Android development guidelines.
- Built 10+ reusable Jetpack Compose UI components and integrated 5+ REST APIs using Retrofit, improving code reusability and application maintainability.
- Participated in the complete Android software development lifecycle including feature implementation, debugging, testing, code reviews, Git version control, Gradle build management, and Agile-based collaborative development.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science Engineering 2022 – 2026
Anasaheb Dange College of Engineering & Technology, Shivaji University
CGPA: 7.8 / 10

SKILLS

Languages

Java, Kotlin, Python, Dart, JavaScript, C++, SQL

Databases & APIs

Firebase Realtime Database, Firebase Authentication, Firestore, Room Database (SQLite), REST APIs, Retrofit, JSON

AI / Machine Learning

TensorFlow, Scikit-learn, OpenCV, MediaPipe, LSTM, Computer Vision, Pose Estimation

Tools & Platforms

Git, GitHub, Google Play Console, Android Studio, Postman, Linux, AWS

Android

Android SDK, MVVM Architecture, Jetpack Compose, Kotlin Coroutines, Activities & Fragments, XML, Material Design, WorkManager, Gradle

Web & Backend

React.js, Node.js, HTML, CSS

Agentic AI & LLMs

LangChain, LangGraph, Hugging Face Transformers, Sentence Transformers, Embedding Models, Vector Databases (FAISS, ChromaDB), Retrieval Augmented Generation (RAG), Ollama, Prompt Engineering

CERTIFICATIONS

- NPTEL E-Business (Elite, Top 5%) – IIT Kharagpur
- NPTEL Cloud Computing – IIT Kharagpur

ACCOMPLISHMENTS

- GATE 2026 Qualified – Graduate Aptitude Test in Engineering.
- NPTEL E-Business – Elite Certification, Top 5%, IIT Kharagpur.

PROJECTS

Saral Truck

Fleet Management Android App

Tech Stack: Java, MVVM, Firebase, REST APIs

- Engineered KYC verification modules (Aadhaar, RC) with robust REST API error handling, deployed to production for real-world fleet onboarding.
- Provided production UI/UX improvements that streamlined the user task-completion flow for truck management workflows.
- Gathered and translated user requirements into features, shipping 15+ production updates through the Google Play Store.

EGuruji

Education & Exam Results Android App

Tech Stack: Java, Firebase, Android SDK

- Implemented new format result generation for Maharashtra State Board standards (5th and 8th), reducing manual processing and improving accuracy.
- Eliminated duplicate Room Database entries by redesigning local synchronization logic, improving data consistency and offline reliability.
- Diagnosed and solved 20+ production crashes using Firebase Crashlytics, improving application stability across diverse Android devices and 10+ production updates including UI improvements, and application stability enhancements. .

Asim Agro

E-commerce Platform

Tech Stack: React, Node.js, Firebase

- Built and deployed a live e-commerce platform managing 30+ products and supporting real-world order management workflows.
- Developed a full admin dashboard for product management, order tracking, and delivery monitoring.

Silent Screams

Real-Time Distress Detection System

Tech Stack: TensorFlow, MediaPipe, OpenCV, LSTM

- Engineered a fully offline behavioral anomaly detection system using TensorFlow, Bi-LSTM, MediaPipe, and OpenCV for privacy-preserving distress detection.
- Trained a Bi-LSTM model on 200+ annotated video clips across two behavioral classes using 33-pose keypoints extracted at 30 FPS.
- Achieved 86% inference accuracy, < 120 ms CPU inference latency, and < 2% false-positive rate, enabling real-time local alerts without cloud dependency.
